

DEV-BF5xxDA-Lite Development Board

Blackfin

The DEV-BF5xxDA-Lite Development Board with integrated Debug Agent is designed for evaluating and programming Blackfin based Core Modules from Bluetechnix. The integrated Debug Agent is a USB based debug interface which enables programming and debugging of the Blackfin Core Modules. The development boards provides all interfaces on dedicated connectors or expansion connectors. Extender boards can be plugged on top of the Development Board in order to enable additional interfaces. All Blackfin Core Modules have compatible connectors and can be replaced with each other.
